

A stylized fantasy landscape illustration. In the upper left, a black silhouette of a dragon with large wings is flying. The sky is a light beige color with several small black birds in flight. On the right side, a large, bright yellow sun is partially obscured by a black silhouette of a castle with multiple spires and towers. The foreground consists of dark green and black silhouettes of mountains and trees. The overall style is flat and minimalist.

Kilopi Whitepaper Version 0.4

Abstract

Kilopi is a game server service provider and has crucial experience about building a solid game server economy specially in the game like Ultima Online, Minecraft, Legends of Aria etc.

After the improvement of the blockchain technology, Kilopi has decided to involve to the new era with fixing an important problem about the game servers. The problem is the gap between the game server economies and real life economies. Kilopi [LOP] token will be a solid, easy to use, flexible and fast solution for this problem.

Kilopi will develop simple dAPPs which can easily connect to the game server economies. These dAPPs will only be very simple and powerful bridges between the game server economies and the real life economies. Kilopi will not be involved with all the items in the game server, Kilopi will only be involved with the game servers' one value determinant item, like «in game gold». Later on, a proper NFT schedule will be announced with involving only the artistic items in the game server.

08 — Future

The background is a stylized illustration of a medieval landscape. In the foreground, there are dark green, jagged silhouettes of trees and hills. In the middle ground, a large, dark silhouette of a castle with multiple towers and a central spire is visible on the right side. The sky is a light beige color with several dark silhouettes of dragons flying. One dragon is on the left, and another is on the right. There are also several small, dark silhouettes of birds flying in the sky. The overall style is flat and minimalist.

01

Purpose

Starting from the bottom, starting from the «easy to adopt» game servers and resuming slowly and surely with the harder ones, at the end, Kilopi [LOP] will be the most «easy to use» and «powerful» bridge between the game servers' economies and real life economies.

Problem

Starting from the first game ever made, up to now, there is a gap between the in-game economy and the real economy. This gap is making the games «virtual». After the improvements in the technology, some good crypto projects have started to fulfill this gap and solve this problem. But the real problem is, «How to solve this problem with being very fast, easy to use and powerful»

Solution

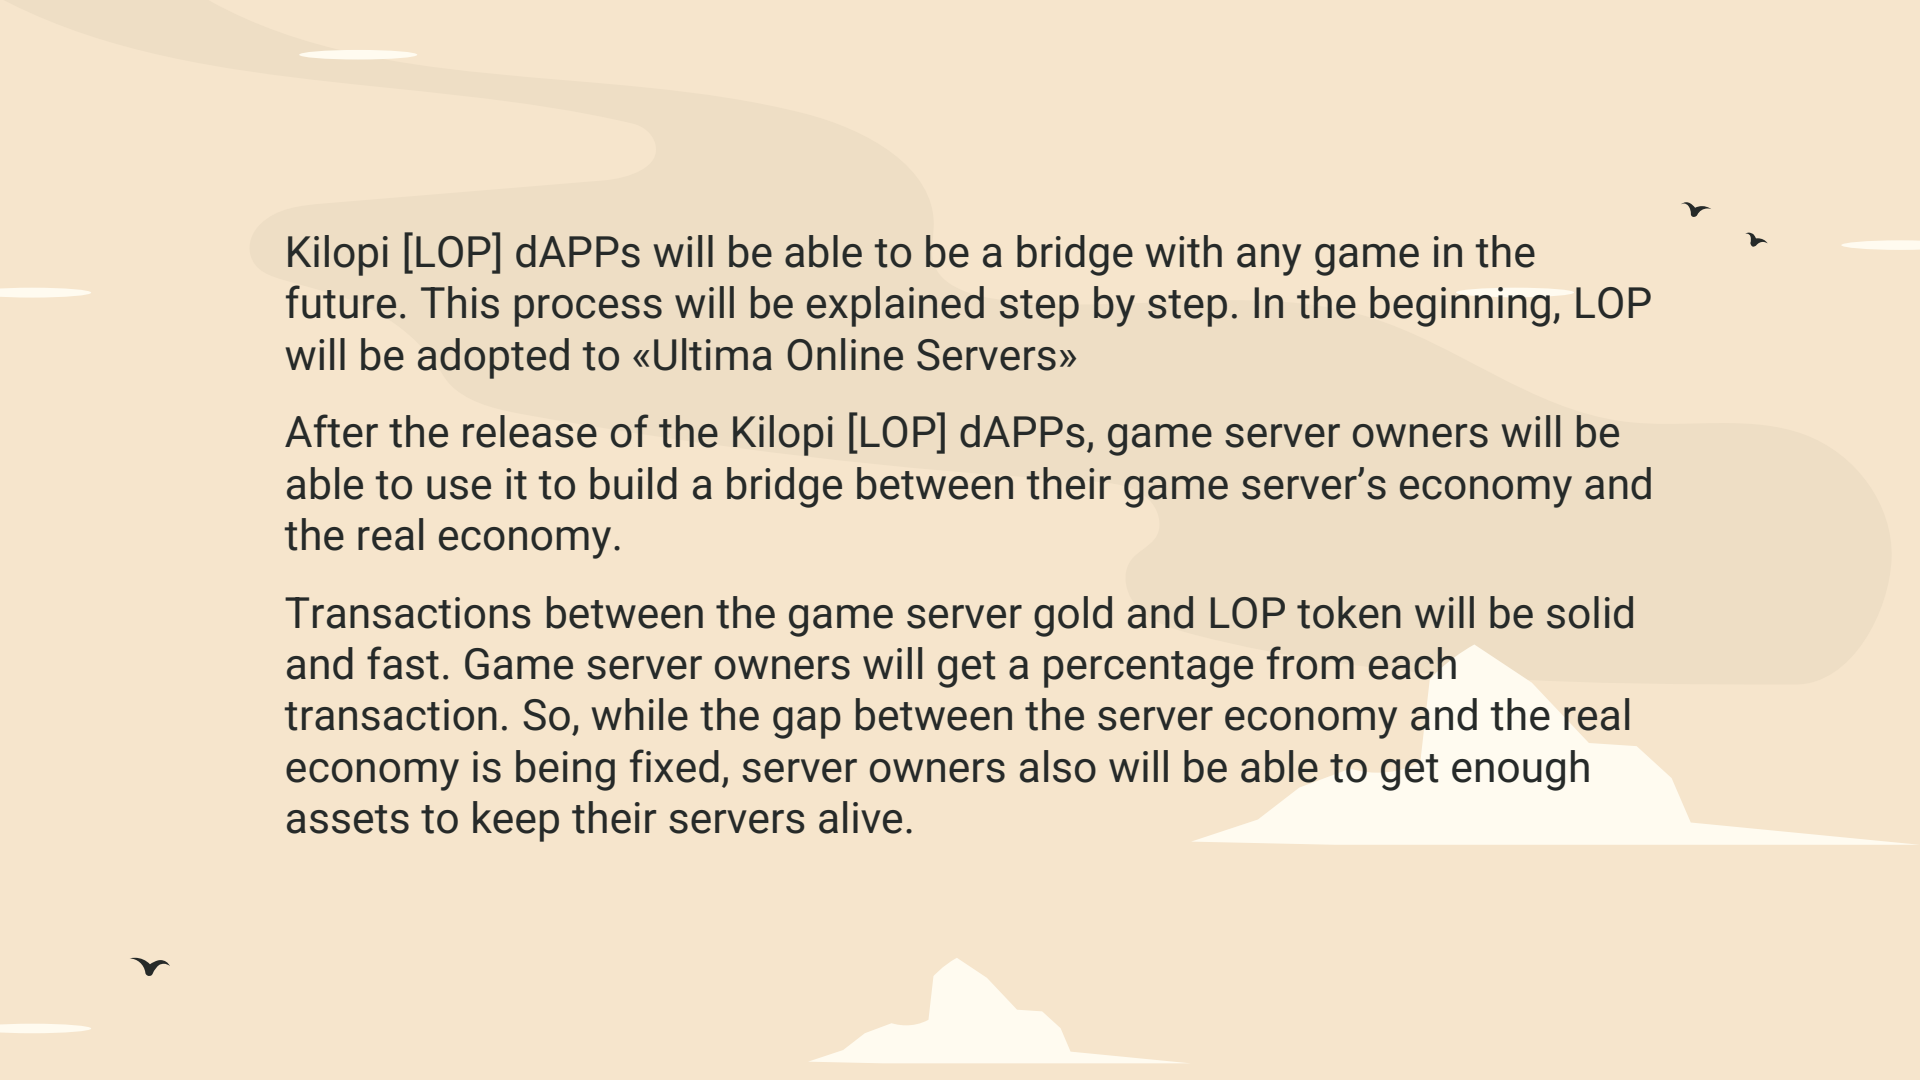

To solve this problem with being very fast, easy to use and powerful, Kilopi [LOP] token will make very powerful, easy to use and fast dAPPS which will only be a connection between the game servers' golds and LOP token

02

Games and Servers

Kilopi [LOP] dAPPs will be able to be a bridge with any game in the future. This process will be explained step by step. In the beginning, LOP will be adopted to «Ultima Online Servers»

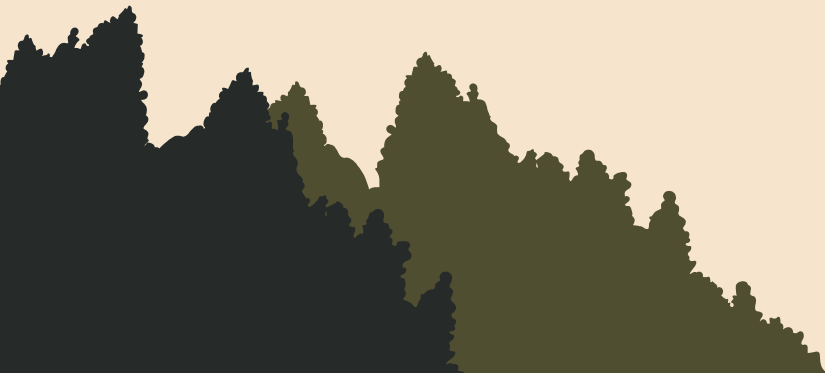

After the release of the Kilopi [LOP] dAPPs, game server owners will be able to use it to build a bridge between their game server's economy and the real economy.

Transactions between the game server gold and LOP token will be solid and fast. Game server owners will get a percentage from each transaction. So, while the gap between the server economy and the real economy is being fixed, server owners also will be able to get enough assets to keep their servers alive.

03

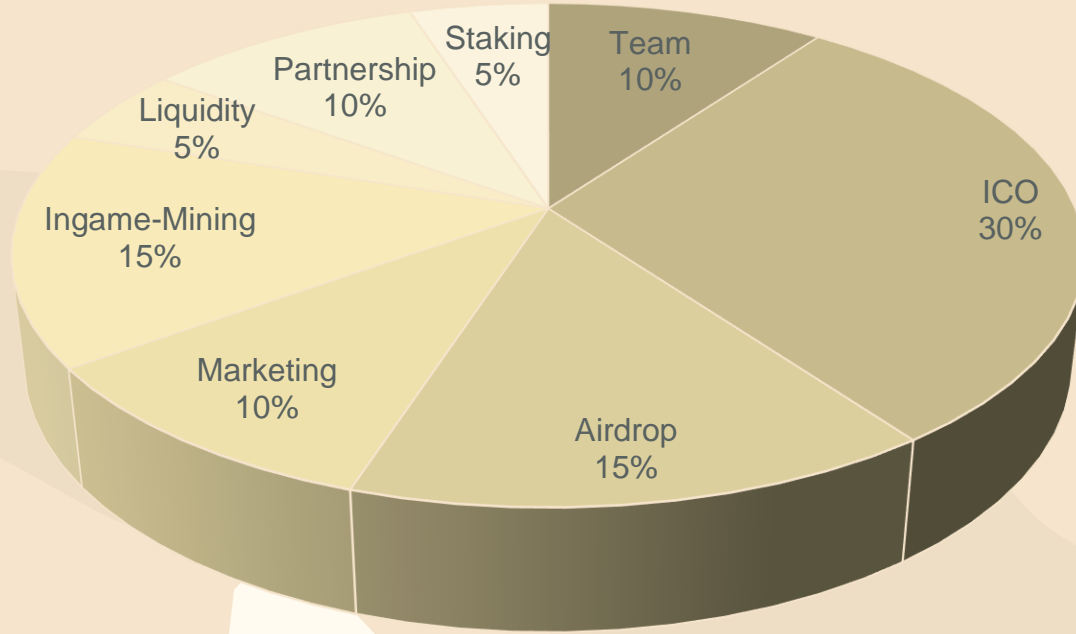

Ecosystem

On the one side, there are game servers. On the other side, there are the amazing blockchains. Between these structures, there is the Kilopi LOP token and its dAPPs. Kilopi LOP token and its dAPPs will not involve with all the game server items. It will mainly interact with the game servers' golds and most important NFT based items.

Token Distribution

■ Team ■ ICO ■ Airdrop ■ Marketing ■ Mining ■ Liquidity ■ Partnership ■ Staking

04 Team

The core team behind the Kilopi LOP token consists of 3 people as seen below. Besides the core team, Kilopi LOP token is mineable by working for the sake of the project. This means, whenever someone does some work for the project, that person gets rewards as LOP tokens and be a team member. Most helpful ones will be shown as a team member in the website later.

05

Features

Wallet

Kilopi LOP token will use Tronlink as a default wallet until Tronchain advises a new one. Also other wallets will be useable for the other blockchains.

dAPP

Kilopi LOP token will have web dAPPs on the blockchains it uses. These dAPPs will act like exchanges between LOP tokens and game server golds.

Game Server Accounts

Players will have their normal game accounts that they have before. There will be no need to create a new account for the adoption of the system.

Game Server Gold Values

Game server golds will have values depending on the Kilopi LOP tokens. But LOP token will not have any decision or involvement with the values of the game server golds. Values will be determined by the players/traders who are buying and selling the game server golds.

Game Servers

Game servers will keep hosting the game. Kilopi LOP will only need to interact with their database of the servers.

SDKs

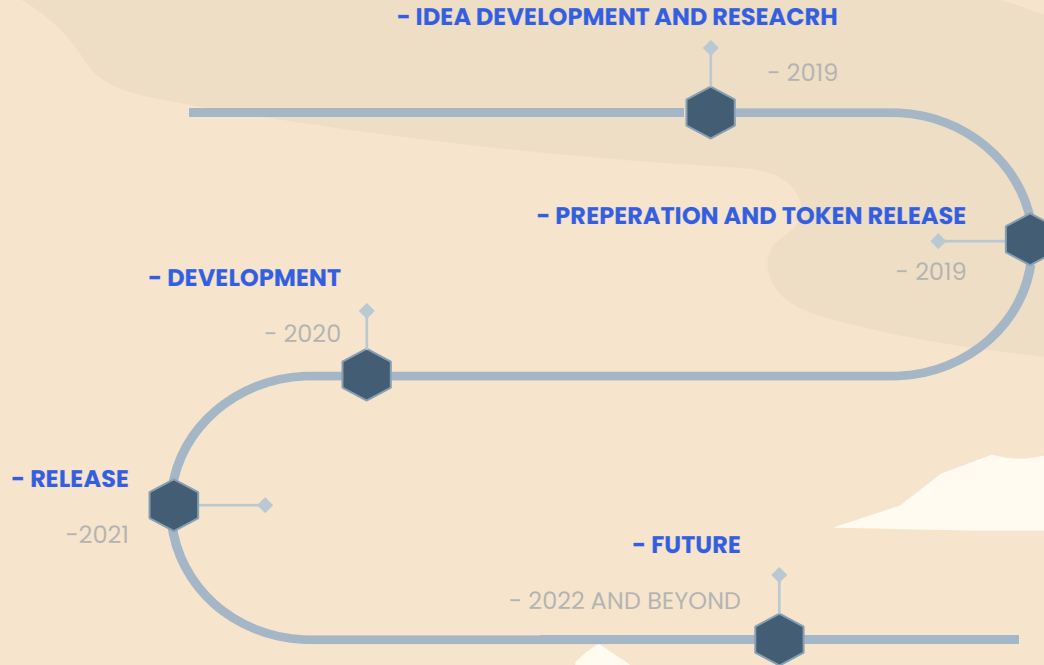

Kilopi LOP token will provide necessary SDKs as simple as possible for game server owners to connect their server with the Kilopi Lop

The background is a stylized landscape with a light beige sky and dark green ground. A large, white, circular sun or moon is in the upper right. A dragon is flying in the center, and several birds are scattered across the sky. The text '06 Roadmap' is prominently displayed on the left side.

06

Roadmap

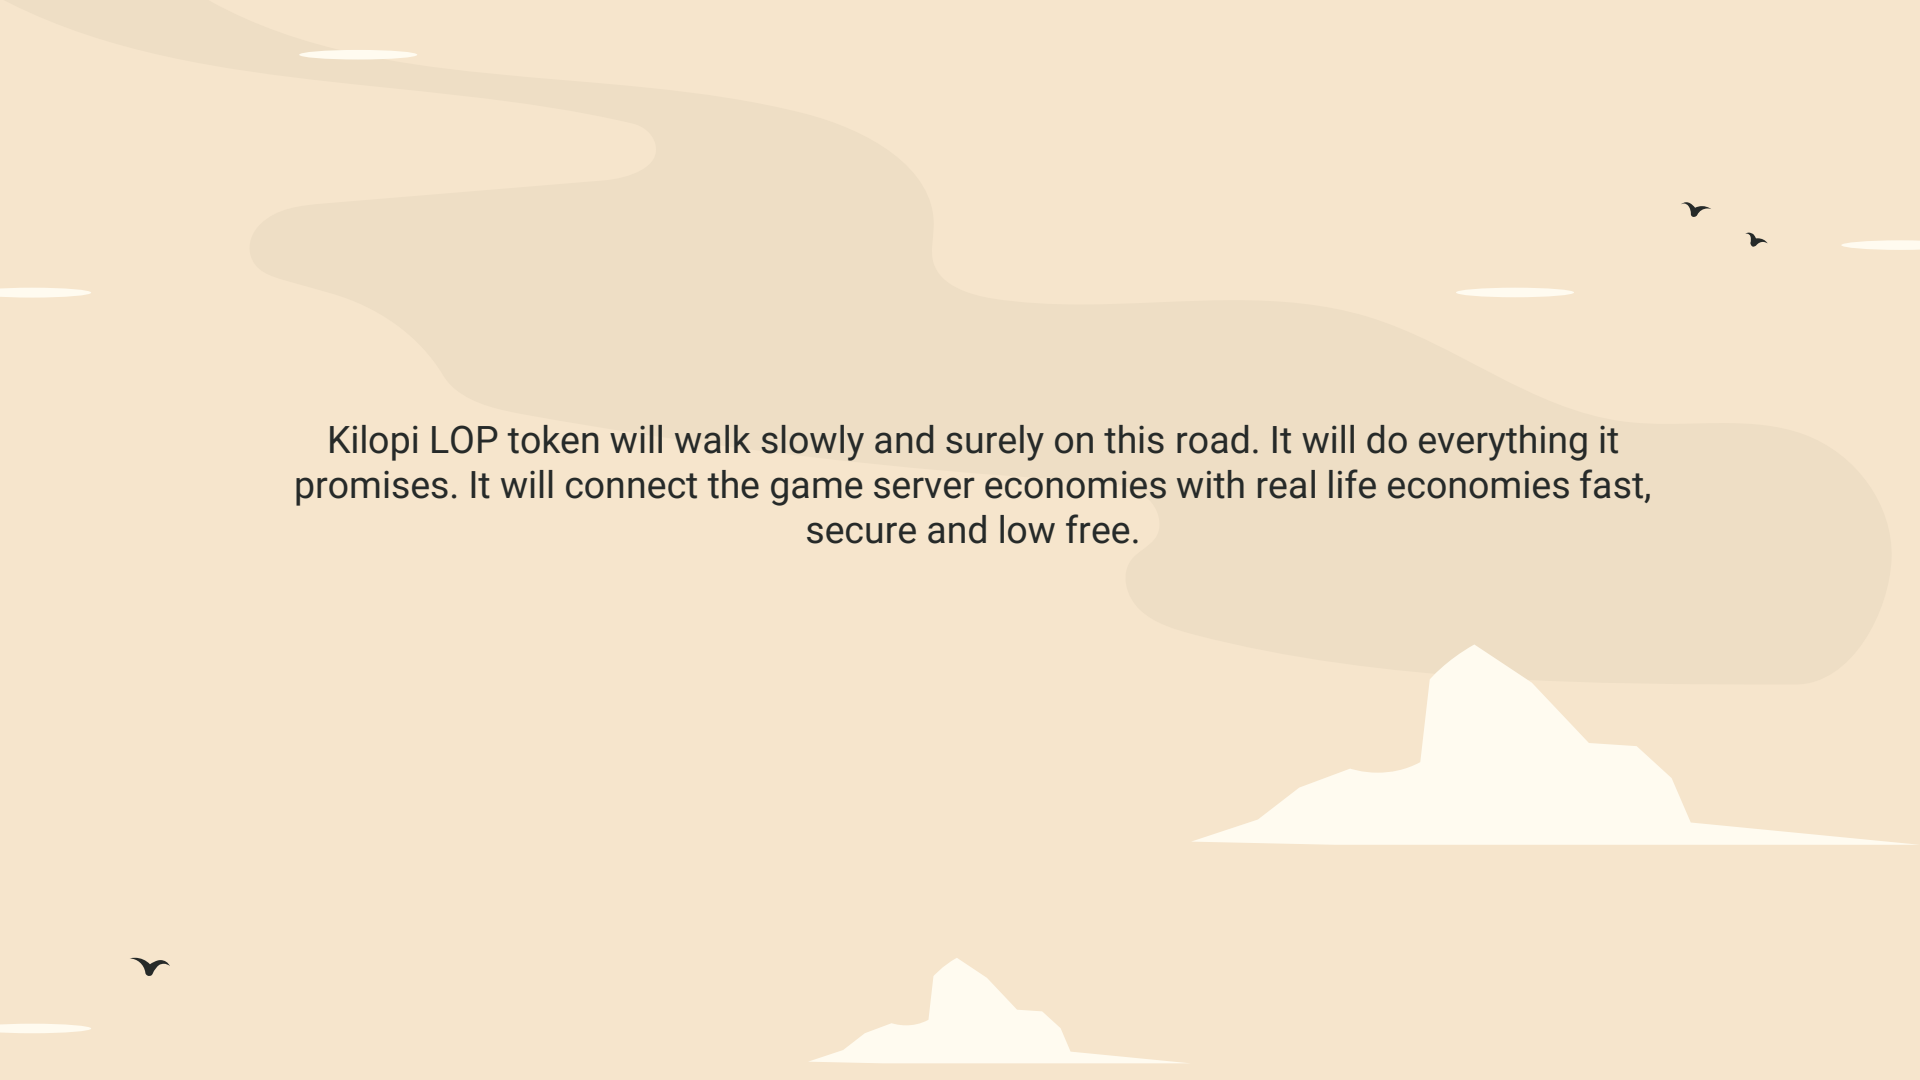

Kilopi LOP will revise its roadmap whenever it partnerships with a company and adds new features to itself. But generally, it will stay loyal to this roadmap.

07

Conclusion

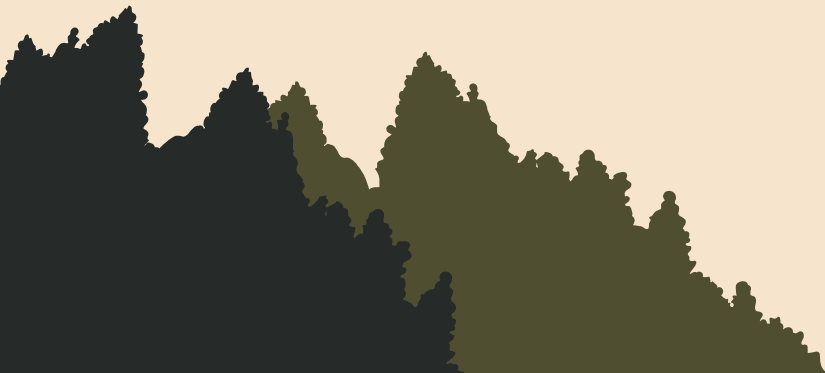

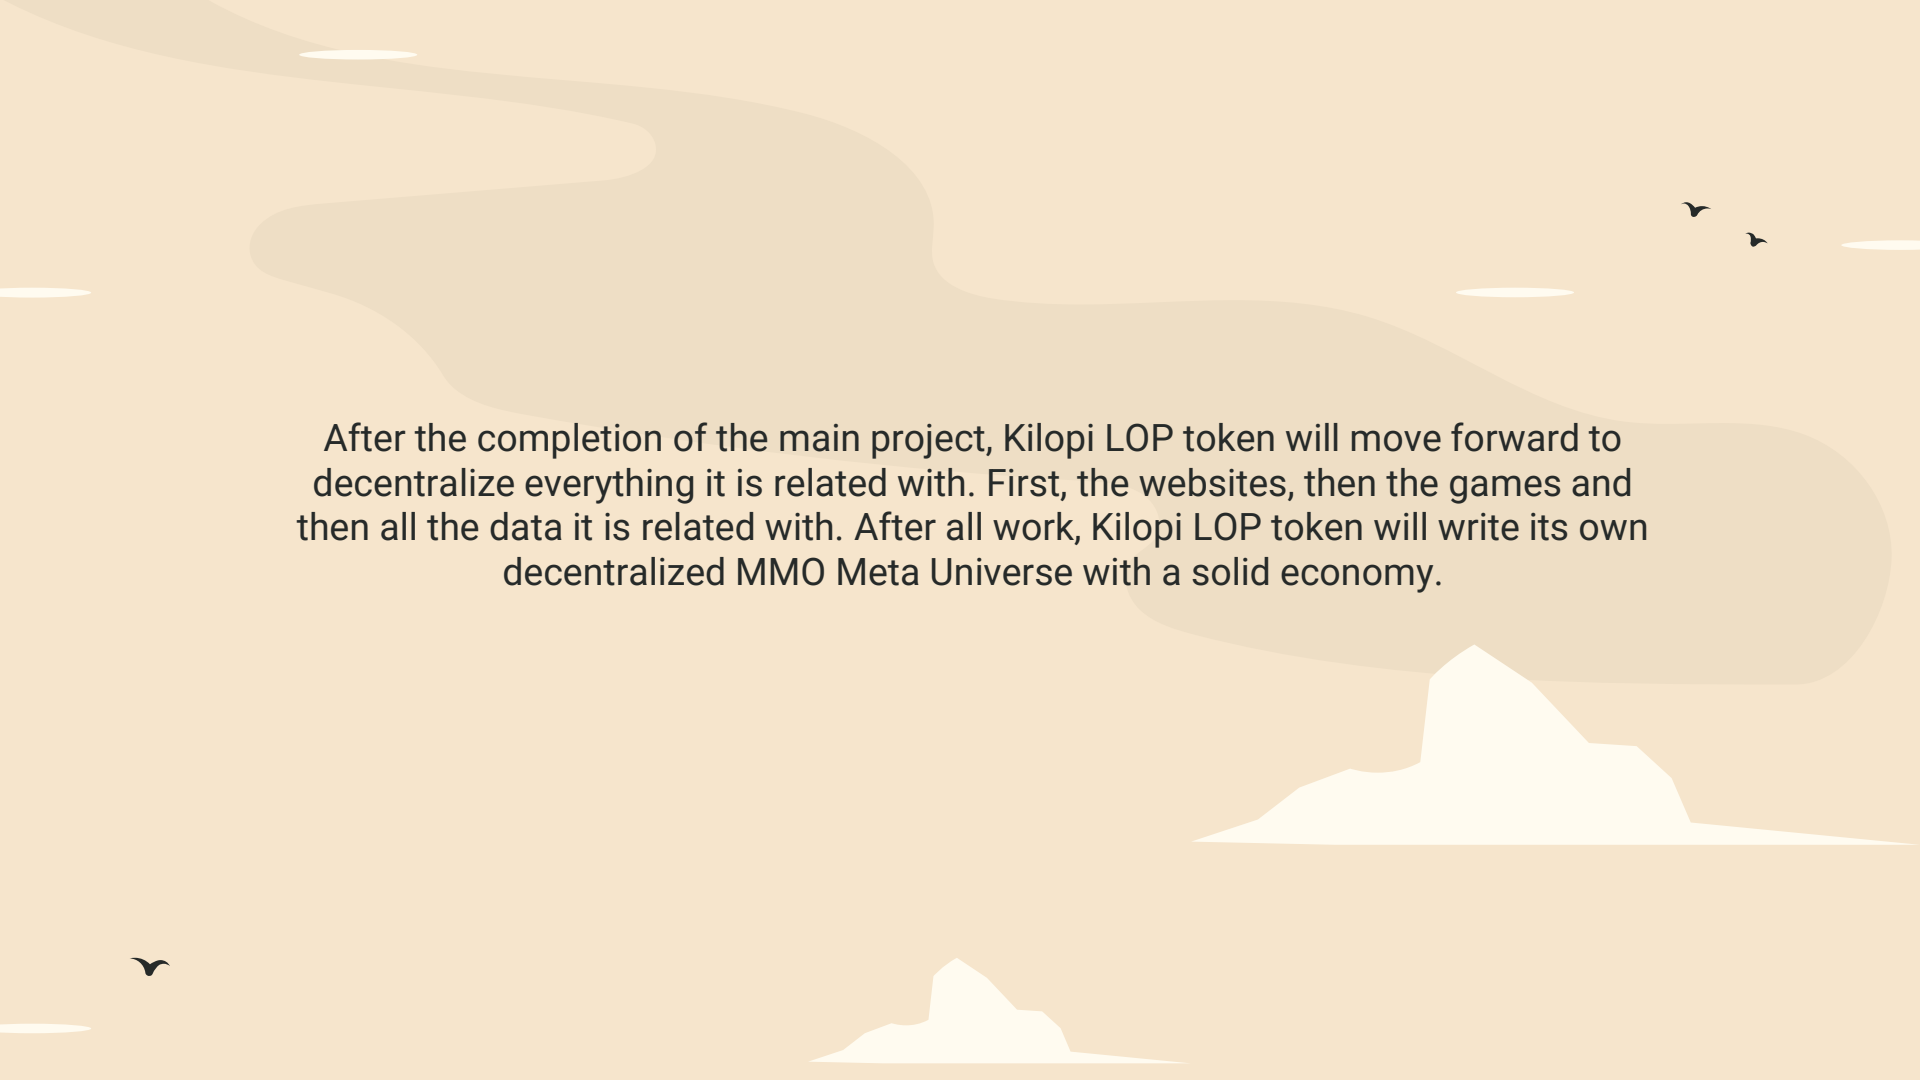

Kilopi LOP token will walk slowly and surely on this road. It will do everything it promises. It will connect the game server economies with real life economies fast, secure and low free.

08

Future

After the completion of the main project, Kilopi LOP token will move forward to decentralize everything it is related with. First, the websites, then the games and then all the data it is related with. After all work, Kilopi LOP token will write its own decentralized MMO Meta Universe with a solid economy.
